EndNote X3 - Formatting Documents - Adding Text after a Citation

This is only applicable to **author-date styles**.

Some styles allow you to add text after a citation. Normally this will be a specific page number. Your paper must be formatted in an author-date style.

Click on the in-text citation, e.g. (Jones, 1993), to highlight it.

Click on the **Edit Citation(s)** button and the dialogue box will open. In the box labelled **Suffix** type: **p. 11**

You must type a space before “p.” to ensure that there is a space between the citation in the document and the suffix. Click on the **OK** button, and EndNote will reformat the citation with the text after the citation. As an example, see the second reference in the example below.

**Save** this change to your document.

**Recent Developments in Personal Bibliographic Software: a Critical Review**

By J.W. Bloggs

Since the 1980s, there have been a variety of software products on the market which can be classified under the general heading of Personal Bibliographic Software (see also Budd, 1988). All of these products perform the same two basic functions: they allow the user to maintain a database of bibliographic references and they permit the generation of a bibliography containing some or all of those references (Hall, 1999 p. 11). This has been demonstrated by Barnes (1988).

**In-Text Citation with Suffixed Text**
Why can't I just enter the page number in the Pages box?

When you click on the Edit Citations button, the dialogue box which appears has sections for Prefix, Suffix, and Pages. It seems logical to enter a page number in the Pages box.

In earlier versions of EndNote, the Pages box was only for footnote styles. It was not used for author-date output styles such as APA or Harvard. In recent versions of EndNote, some author-date output styles (e.g., APA 5th) are configured so that you can just enter a page number in the Pages box, and EndNote will format the reference and add all the necessary punctuation for you.
